

# EduLearn360™

## Scalable, Customizable LMS for Modern Learning

EduLearn is a fully managed, cloud-based Learning Management System (LMS) designed for educational institutions, corporate training programs, and global learning initiatives. As a core module of the EduSuite360 ecosystem, EduLearn delivers scalable, secure, and fully customizable LMS environments powered by AWS and DigitalOcean.

### Key Capabilities

**Turnkey LMS Deployment:** Canvas and LearnDash set up on cloud infrastructure with SSL, DNS, and uptime monitoring.

**Customization:** Branded interfaces, custom dashboards, and user roles aligned with institutional workflows.

**Integrated Tools:** LTI-based integrations with Zoom, Google Workspace, Turnitin, HR systems, and more.

**Performance & Automation:** Real-time monitoring, automated provisioning, backup, and grading sync reduce manual effort.

**Reusable Templates:** Professionally designed course blueprints for consistent, scalable delivery.

#### Challenges We Solve

- Ensuring scalable and secure hosting
- Deep customization to reflect institutional identity
- Seamless tool and system integrations
- Performance monitoring and latency prevention
- Workflow automation to reduce administrative overhead

#### Proven Results Across Sectors

- **Higher Education:** 99.98% uptime and 67% drop in LMS support tickets
- **Financial Services:** 98% corporate training completion
- **Continuing Education:** Rapid deployment of microcredentials
- **Nonprofits:** 40% training reach expansion in low-bandwidth regions

#### Why EduLearn?

- End-to-End managed service
- Custom UX for students, admins, and faculty
- Integrated ecosystem (EduSuite360)
- High performance, cloudnative Infrastructure
- Future proof scalability and Innovation
