

EduSuite360™

A Unified Educational Technology Ecosystem

Empowering Institutions with Integrated, Scalable, and Intelligent Solutions

EduSuite360™ is a comprehensive suite of educational technology solutions designed to modernize and streamline operations across higher education institutions, training providers, and corporate learning environments. The suite brings together five interrelated systems—EduTrack, EduLearn, EduContent, EduCustomer, and EduInfrastructure—offering a seamless, cloud-native ecosystem for managing learning, content, relationships, and infrastructure with efficiency and innovation.

EduTrack360™ – Student Information System (SIS)

Digitizes the academic lifecycle—from admissions to alumni relations. Automates workflows, centralizes student data, and supports advising and records management with real-time reporting.

- 50–70% faster admissions and enrollment
- Integrated HR, finance, and advising tools
- Role-based portals with enhanced compliance

EduLearn360™ – Learning Management System (LMS)

A fully managed, customizable cloud-based LMS built for scalability and performance. Integrates with tools like Zoom, Google, and Turnitin, supporting consistent learning experiences.

- Canvas and LearnDash deployment with branded UX
- Real-time grading sync, backup, and provisioning
- Used by higher ed, nonprofits, and corporate training sectors

EduContent360™ – Content Development and Publishing

Supports course design and delivery for in-person, online, virtual live, and self-paced formats. Enables authoring, multimedia integration, localization, and publication across platforms.

- Reusable course templates and instructional design support
- Compatible with SCORM/xAPI and multiple LMS systems
- Facilitates multi-language and microlearning content

EduCustomer360™ – Customer Relationship Management (CRM)

Manages the full student and customer engagement lifecycle—from prospecting to alumni support. Enhances outreach, onboarding, and communication using powerful analytics and marketing tools.

- Automated lead management and segmentation
- Campaign tracking and stakeholder engagement
- CRM integration across web, mobile, and email channels

EduInfrastructure360™ – Cloud Hosting and IT Services

Provides robust infrastructure services including hosting, SSO, security, and data integration. Supports AWS, DigitalOcean, and enterprise-grade uptime with automated backups and monitoring.

- Seamless LMS/SIS integration with secure cloud deployment
- Domain and SSL management, uptime monitoring
- Supports authentication and authorization protocols (SSO, OAuth)

Why EduSuite360?

- Unified ecosystem tailored for education and training
- Role-based user experiences for administrators, faculty, students, and partners
- Scalable, secure, and fully managed services
- Trusted across sectors: higher education, nonprofits, and corporate training
